

What happens if your product fails a regulatory compliance test? In today's global marketplace, loss of control can be a major roadblock to your success. The loss of revenue, added expenses, and delays in getting your product to market can keep you at a competitive disadvantage.

Understanding worldwide regulatory compliance is our business. Our experienced and reliable staff of NARTE Certified engineers can provide you with all aspects of EMI/EMC and Product Safety consulting and training, from review of preliminary concepts to fixing your problems.

We have offered design support to logic designers, printed circuit designers, test engineers and mechanical engineers in the military/aerospace and commercial information technology equipment (ITE), audio/video, control/measurement/laboratory, machinery, home appliances and medical fields.

Product Safety:

- Pre-compliance Construction Evaluation
- Pre-compliance Testing Evaluation
- Product Design Review
- Assistance in resolving non-compliance issues
- Troubleshooting and Retrofitting

EMC/EMI:

- Design and Analysis of Printed Circuit Boards
- Design Reviews during and after R&D stage
- Recommend Design Strategies for EMC Compliance
- Troubleshooting and Retrofitting
- Develop Technical Construction Files (TCF)

Other Services:

- Regulatory Compliance Seminars and Training
- Regulatory Compliance Outsourcing
- International Regulatory Compliance Assistance
- Develop Regulatory Test Plans, Methods and Procedures
- Identify Proper Critical Components

Obtaining domestic and/or international Regulatory Compliance certifications (UL, cUL, CSA, ETL, TUV, CB, CE, FCC, eK, MIC, C-TICK, VCCI, BSMI, GOST-R, CCC, NEBS, MIL, NSF, SEMI, etc.) can be time consuming and expensive. In order to alleviate the burden from the manufacturer, G&M Compliance offers the above consulting services on a project-by-project or on an hourly basis, depending on your preference.

Our goal is to provide you with the most practical, accurate and least expensive solution to your regulatory compliance problems. We have the ability to solve problems before and during the testing process and help you expedite and ensure a seamless path to market.
