

Certification Type	Product Label Markings	Manual Requirement
<p>FCC Declaration of Conformity (Unintentional)</p> <p><i>Note: This type of approval is only for Class B PCs and PC peripherals</i></p>	<div data-bbox="370 243 727 394" style="border: 1px solid black; padding: 5px; margin-bottom: 10px;">  </div> <p><i>Note: This logo does not need the rectangular border if the label area is too small. The tradename and model must still be marked on the product.</i></p>	<p>This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.</p> <p>Note: Class B requirements from FCC Verification stated below also apply.</p>
<p>FCC Verification (Unintentional, Class B)</p>	<p>"This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation."</p>	<p>"This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:</p> <ul style="list-style-type: none"> * Reorient or relocate the receiving antenna. * Increase the separation between the equipment and receiver. * Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. * Consult the dealer or an experienced radio/TV technician for help." <p>"Changes or modifications not expressly approved by "Company name" could void the user's authority to operate the equipment."</p>

FCC Verification (Unintentional, Class A)	<p>"This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation."</p>	<p>"This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense."</p> <p>"Changes or modifications not expressly approved by "Company Name" could void the user's authority to operate the equipment."</p>
FCC (Wireless Modular Approval)	<p>Contains FCC ID: #</p>	<p>Class A or B markings as indicated above should also be in the manual for wireless devices.</p>
FCC (Wireless System Approval)	<p>FCC ID: #</p>	<p>Class A or B markings as indicated above should also be in the manual for wireless devices.</p>
Industry Canada (Unintentional)	<p>CAN ICES-3 (*)/NMB-3(*)</p> <p>(*) Insert either "A" or "B" but not both as appropriate for the equipment requirements. (Only for non-wireless equipment)</p>	
Industry Canada (Wireless Modular Approval)	<p>Contains IC: #, Model: #</p>	<p>This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.</p> <p>Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.</p>

Industry Canada (Wireless w/ Detachable Antennas)	Contains IC: #, Model: #	<p>Above IC wireless manual requirements plus the following:</p> <p>Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.</p> <p>Conformément à la réglementation d'Industrie Canada, le présent émetteur radio peut fonctionner avec une antenne d'un type et d'un gain maximal (ou inférieur) approuvé pour l'émetteur par Industrie Canada. Dans le but de réduire les risques de brouillage radioélectrique à l'intention des autres utilisateurs, il faut choisir le type d'antenne et son gain de sorte que la puissance isotrope rayonnée équivalente (p.i.r.e.) ne dépasse pas l'intensité nécessaire à l'établissement d'une communication satisfaisante.</p> <p>This radio transmitter (identify the device by certification number, or model number if Category II) has been approved by Industry Canada to operate with the antenna types listed below with the maximum permissible gain and required antenna impedance for each antenna type indicated. Antenna types not included in this list, having a gain greater than the maximum gain indicated for that type, are strictly prohibited for use with this device.</p> <p>Le présent émetteur radio (identifier le dispositif par son numéro de certification ou son numéro de modèle s'il fait partie du matériel de catégorie I) a été approuvé par Industrie Canada pour fonctionner avec les types d'antenne énumérés ci-dessous et ayant un gain admissible maximal et l'impédance requise pour chaque type d'antenne. Les types d'antenne non inclus dans cette liste, ou dont le gain est supérieur au gain maximal indiqué, sont strictement interdits pour l'exploitation de l'émetteur.</p>
Industry Canada Wireless (System Approval)	IC: #, Model: #	<p>Same Manual Requirements as Above.</p>
